

The advanced multi-level device management solution from OKI Printing Solutions

Enterprise Edition
Professional Edition

PrintSuperVision is an easy way for businesses – large and small – to proactively monitor and manage their document imaging devices.

Highlights:

- Available in Professional¹ and Enterprise editions
- Proactively manage OKI Printing Solutions printers/MFPs and most compatible devices from other manufacturers:
 - Monitor printing costs
 - View maintenance logs
 - Predict toner levels and image drum life² for accurate planning
- Easy to set up; copy settings from one printer to many
- Use standard Web browsers to view device status
- View usage reports on-screen or in XML and Excel[®] formats; export data in Text and CSV formats
- Schedule reports and generate automated e-mail delivery
- Order supplies online or generate hard-copy purchase orders

PrintSuperVision (PSV) is OKI Printing Solutions' device monitoring software, now available in two distinct editions to better meet the needs of today's organizations. For small and medium-size businesses, there's *PSV Professional Edition*, designed with simplicity in mind. Its easy-to-use interface is accessible from any network-connected PC capable of running a browser—which makes the utility accessible from virtually anywhere.

Configured as a server, PSV Professional monitors a device's health, sends e-mail alerts, reports supply status and consumable levels, tracks printed pages, and even lets you order supplies online—all with just a few mouse clicks.

A single-user Small Business option ("Easy Setup") within PSV Professional can be installed in a non-server configuration on compatible Windows[®] desktops or laptops. This simple alternative checks supply levels, generates usage reports and speeds the online ordering process.

Support for several thousand print, copy and multifunction devices. For larger companies, school districts, law firms, healthcare institutions and the like there's *PSV Enterprise Edition*. Designed to support OKI[®] and non-OKI network-compatible devices, PSV Enterprise enables help desks and IT staff to more productively manage a fleet of print-and-copy devices.

PSV Enterprise leverages the strengths of the Professional Edition and is packed with additional time-saving functionality. The "Near Me" feature allows you to quickly obtain the status of devices located within close proximity of your client PC—with no configuration needed. The "Supplies Usage" report predicts when consumables need to be replaced. And, with just a few clicks, you can order supplies from your favorite web site.

You can even import images of floor plans or geographical maps and pinpoint the location of any device through a "Map" view—complete with interactive icons displaying device status.

Accommodating the way you do business. Both PrintSuperVision editions are a snap to use. Their Microsoft[®]-based design provides familiar browser navigation and the flexibility to customize the user interface to your preferences.

Usage reports—with striking graphs and charts—can be generated with just a few clicks. And, for more detailed management reports, both PSV editions enable you to export data as text, CSV, XML and Microsoft[®] Excel[®] files.

When it comes to making the most of your time, PrintSuperVision from OKI Printing Solutions is an effective addition to your demanding IT environment.

¹ "Easy Setup" is a stand-alone option for Small Office environments.

² Works only with current OKI Printing Solutions branded Digital Color printers; not backward compatible. Contact your authorized OKI Printing Solutions reseller for a complete list.

PrintSuperVision

Feature Summary

Feature/Functionality	Professional Edition	Enterprise Edition
Enterprise SQL Integration	No	Yes
Device Cloning	No	Yes
